

Beyond Compare – A Powerful Time-Saving Windows Utility for Comparing Files and Folders

Chipkin Automation Systems Inc has developed “Beyond Compare”, a time-saving utility which helps to compare files and folders on Windows machines.

Vancouver, BC – Beyond Compare, the latest version 2.2.7 has been released by Chipkin Automation Systems Inc. It is a powerful utility to manage source code, keep folders in sync, compare program output and validate copies of the data on Windows system.

Beyond Compare can create a snapshot of a live directory structure and compare it against the live copy at a later date. Furthermore, it analyzes differences in detail and carefully reconcile them. The program commands a wide range of file and text operations as well as script commands for automating tasks.

Packed with many other helpful features such as its explorer-like interface, multiple display filters, various criteria for comparing files, binary content comparison, fast byte-by-byte compare of binary files, thumbnail summary of differences, Unicode and MBCS support, ability to compare clipboard contents against file or other contents and to compare and edit Delphi .DFM files as text certainly make this a must-have utility for every automation professional.

The 30-free trial of Beyond Compare can be downloaded on <http://www.chipkin.com/beyond-compare/>
