CHIPKIN

Chipkin Product Announcement - EKM Metering Protocol Gateways now Available!

Chipkin Automation Systems Inc. is proud to announce a much-anticipated product release. We have developed a custom driver for EKM Metering which allows other drivers to access the EKM Meter data and serve using other protocols such as BACnet and Modbus

Vancouver, BC, Canada - March 13, 2019 - Chipkin has developed an EKM Metering serial driver that connects to a trunk of 1 or more (v3 and v4) EKM Meters using RS485. It is capable of reading energy, operational, and status data from each meter. The driver is also capable of being linked with other FieldServer drivers to form regular FieldServer firmware that can be installed on QuickServer and other FieldServer gateways.

We have added the EKM Metering driver to 8 new Protocol Gateways which will allow for data transfer across the following protocols: Modbus TCP, Modbus RTU, BACnet/IP, BACnet MS/TP, EtherNet/IP, LonWorks, HTTP (XML), & SNMP. To get more information, or to inquire about purchasing an EKM FieldServer Gateway, please check out our website:
